As a Computer Science graduate with experience in project management and technical research, I am excited to apply for the Intern Software Engineer position at PTC. My blend of academic knowledge and practical experience make me an ideal candidate for the role.

With a passion for technology and a strong foundation in computer science, data structures, and algorithms, my career goal is to contribute to creating cutting-edge software solutions. I am particularly drawn to PTC's commitment to innovation and collaboration, which aligns with my own approach to software development.

- My experience as a Salesforce Project Lead at Household Capital gave me valuable exposure to cloud-based tech solutions. I was instrumental in the implementation of the Email-to-Case feature, enhancing customer service efficiency and business operations.
- I have a proven track record in project management, having led end-to-end projects and collaborated with cross-functional teams to align technical solutions with business goals.
- My technical skill set includes proficiency in Python, JavaScript, and AWS EC2, which I believe will be beneficial in the role of an Onshape R&D Software Engineer.
- I am certified in Salesforce and Amazon AWS, demonstrating my ability to grasp and apply complex technical concepts effectively.

I am confident that my technical expertise, project management experience, and passion for innovation would make me a valuable addition to the PTC team. I look forward to the opportunity to discuss my candidacy further. Thank you for considering my application.

Sincerely,
Joel Paterno
